24" CHAMFER CAP

Weight: 58# ea
1 cap = 2 ln ft
Face Size: 4" x 24"

SHOULDERED PINS

5¼" Long Fiberglass Pins

COMPAC HEWN STONE UNIT

The #1 commercial retaining wall product on the market, the Keystone Compac unit is an installer's favorite. Featuring an open core design and the pin connection system that is trusted by engineers and contractors around the world, the Keystone Compac is lighter weight than other structural blocks and has a shortened tail design that makes it easier to handle and perfect for projects that do not require the embedment length of the Keystone Standard unit. In addition to the traditional sculptured/ tri-plane and straight-face face styles, the Keystone Compac is now available in a variety of weathered finish options including the new Hewn Stone face.

FEATURES

- An innovative face design combined with the features and benefits of a Keystone COMPAC unit.
- Keystone's patented StoneArt embossing technology allows units to be produced in two distinctive faces which creates a random appearance.
- The Hewn Stone face texture resembles natural weathered stone.
- Positive pin-unit connection ensures proper alignment, structural integrity, and the ability to lock geogrid into the wall.

Graystone

Sandstone

Due to inherent characteristics of concrete, color may vary slightly. No guarantee of color shade is made or implied.
