# D E S I G N E R S E R I E S

Since the mid-sixties, burnished or ground-faced masonry units have been used for all types of construction, offering exclusive benefits to the building's owner, designer, and contractors.

## One-step Installation:

Amcon burnished units provide finished structural or non-structural walls in a single contractor, one-step operation. Amcon Block can offer significant savings in time and money. Economy – “the bottom line.”

## Natural Beauty:

Amcon burnished units provide naturally colored aggregates from different parts of the country. They offer a wide color range and long-life performance that you would expect from masonry. Appearance – “a primary consideration.”

## Water Repellent:

Amcon burnished block can be manufactured with DRY-BLOCK water repellent admixture providing a wall that resists water absorption. Amcon Block has been a certified DRY-BLOCK manufacturer since 1989.

## Maintenance-Free:

Amcon's burnished finishes will last the lifetime of your building. Performance – “essential.”

## Design Flexibility:

Amcon burnished block offer the designer flexibility through a variety of colors, scoring, chamfers, patterns, bullnose and other special shapes.
