# Advanced Product Solutions & Layout (APS)

## You're Busy. Let Us Do the Layout for You!

If you're managing crews during the day and making sales calls in the evening, you may find it challenging to find uninterrupted time to prepare landscape lighting layouts.

That's one reason we provide a layout service free to you. Send us your project details and inputs – drawings, photos, special customer requests, or preferences – and we'll provide you with a bill of materials and a finished layout free of charge. Layouts are handled by our Advanced Product Solutions, Layout Team (APS). All members of the team are Certified Low Voltage Lighting Technicians (CLVLT) by the Association of Outdoor Lighting Professionals (AOLP). So, you'll be in good hands.

### HERE'S HOW OUR APS LAYOUT SERVICE WORKS

- Email APS at [layouts@kichler.com](mailto:layouts@kichler.com) with a completed design request form (available at [Kichler.com/APS](http://Kichler.com/APS)) and any drawings or pictures related to your job. If possible, provide one or two photos showing details of the house, landscaping, trees' height, and any other aspects of the area being lit.
- Next, the APS team will create a bill of materials (BOM) and a finished layout.

#### We can work with what you give us

We're flexible. If you send professional CAD drawings, our APS team will return these to you with the lighting design incorporated, but if you send only a rough hand drawing and one or two photographs, our team will find a way to work with these, too. The more information you can provide, the better.

#### Impress your customers

Our APS team will provide you with a professional layout including our logo and your logo (provided to us in jpg format), making a favorable impression on your customer. Plus, the layout includes a list of all the required runs, with the fixture load and wire length, which removes all the guesswork for you. A win-win for you and your customer.

### APS Technical Support

In addition to our Layout Team, our APS Technical Support group is available to answer your specific product and layout questions. No question is too complex. We're available 8:00 AM to 6:00 PM EST, Monday-Friday.

**Call us at 844-KICHLER (844-542-4537) or email us at [techsupport@kichler.com](mailto:techsupport@kichler.com).**

For more information visit [Kicher.com/APS](http://Kicher.com/APS)

# Three Tiers of Accent Lights

Which is best for your customer?

We offer a three-tiered system of accent lights, including a very good drop-in LED accent fixture, as well as the ever-popular 12V integrated LED accent in 200-500 lm options (16150-16158) and the best-in-class Variable Lumen Output (VLO) accent with Lumen Effects System.

## 12V Accent Light Solutions

Reviewing the different types of accent lights with your customers will help them decide which will work best for their home and budget.

Your Situation and Needs	Looking for an affordable option that will meet your needs today. Not sure how long you will stay in your present house.	In search of the most reliable product – one that will last a long time and produce the best quality light. Details relating to the light quality and the lighting design are important to you.	In pursuit of the product that is the best investment and will last the longest. You want the very best lighting design, as well as fixtures that will adapt as your landscape changes.
Overview	<b>A solid, economical choice</b> with our quality designs, materials and finishes. May require bulb replacement after a few years.	<b>A highly engineered solution</b> requiring no bulb changing, entirely sealed from the elements. Optimal light quality will produce a beautiful lighting design.	<b>Our premium product,</b> no bulb changing, entirely sealed, optimal light quality, with a built-in feature for adjusting lumen levels. Enables flexibility and fine-tuning of lighting designs. Our longest-lasting product.
	12V Drop-In Accent with LED Lamp	12V Integrated LED Accent	VLO 12V Integrated LED Accent
			
SEALED	Not fully sealed from the elements	Employs advanced engineering, sealing the fixture from all elements	Employs advanced engineering, sealing the fixture from all elements
HEAT MANAGEMENT	Minimal heat management	Advanced thermal management, keeping heat away from the LED and resulting in longer life	Advanced thermal management, keeping heat away from the LED and resulting in longer life
LIGHT QUALITY	Wider LED binning tolerances	Tighter LED binning tolerances	Tighter LED binning tolerances
BULB REPLACEMENT	Bulb replacement may be required after a few years	No bulb replacement required	No bulb replacement required
LUMEN DEPRECIATION	Loses brightness with time	No noticeable loss of brightness during the warranty period	No noticeable loss of brightness during the warranty period
SURGE PROTECTION	None	4kV system protection	6kV system protection
BEAM SPREAD ADJUSTMENT	None	None	Expand beam spread with a special lens accessory; aids in fine-tuning design. For more information see page 21.
DELIVERED LUMENS	Losses due to enclosed fixture	No loss in lumens	No loss in lumens
LUMEN ADJUSTMENT	None	None	Adjustable lumens from 2-4 levels with the touch of a magnet; aids in fine-tuning the lighting design or adjusting to plant and tree growth
LED COLOR SHIFT	Possible over time	None	None
WARRANTY	Limited*	10 years	15 years

This chart compares three tiers of Kichler accent lights. \*The LED bulbs are warranted for 3 or 6 years; the drop-in fixtures are warranted for 5 years (aluminum) or 10 years (brass). Visit [Kichler.com/Warranty](https://www.kichler.com/Warranty) for full warranties and limitations.

## How to Walk Your Customer Through the Options

What is the best way to walk your customer through the three tiers of accent lights? Every professional landscaper will have his or her individual preferences, but here are tips from the experts:

### Important Features

Even before you discuss the product options, try to get a sense of which product features might be most important to your customer. Be a good observer of the property inside and out and see what you can learn through casual conversation.

### Easy Decision Path

Your goal is to create an easy decision path. Help the customer to quickly discern the unique benefits of each price tier.

### Keep it Simple

Be selective and keep it simple. Not every feature is worthy of mention, only those that could tip their decision one way or another.

### Good, Better, Best

It's OK to use the words "good," "better," and "best" because it helps the customer to understand the situation faster.

### Added Features

As you walk the customer through the tiers, emphasize the added features and why they would be important to them, both in the short and long term ownership of their project.

---

## UPSELLING ACCENT LIGHTS

If your customer is leaning toward drop-in accent lights because of the low price point, help them understand that there are other choices that may be better for them in the long run.

For instance, our integrated LED accent light is highly engineered and sealed from the elements, which means it provides many years of reliable service – without bulb changing.

Drop-in accent fixtures, on the other hand, which are also referred to as "retrofits" or "fixture and lamp products," may require attention after a few years, when the LED bulbs inside require changing. Check with your distributor, but in most cases, the difference in price between drop-in and integrated accent is manageable.

It can be justified based on the upgrade in performance and cost savings in the long run, such as:

- Longer performance life (with a longer warranty)
- Better quality of light
- No need to change the bulbs
- No limitations of light or lumen output (like with drop-in)

These are all reasons to lead your customer toward integrated LED accent lights which, over time, may bring greater satisfaction.

## WHY UPSELL?

As a professional, you provide a lot more value to your customer – better light quality from day one and many more years of reliable performance without the need for service. These benefits – and the superior engineering of the integrated accent light – exceed the upsell costs. Your customer's home and landscape, and the reliable performance and longevity of the integrated accent fixtures will bring peace of mind to your customer.

One effective technique for upselling is to hand an integrated fixture to your customer and let them feel the weight of it. Then, explain to them that the product is heavy for a reason. There's advanced technology inside that enables that fixture to produce uniform, quality light over a long period of time. That's why we can confidently offer a remarkable warranty on integrated LED accent fixtures.

# Lighting Design Tips

## Selecting the Perfect Color Temperature

Many of our integrated LED fixtures and LED lamps come in a variety of color temperatures – from warm white to pure white to bright white – that can enhance the colors in a home’s exterior and landscape. Measured by Kelvin (K) degrees, consider these suggestions for your applications:

**WARM WHITE - 2700K**

- Ideal for surroundings with warmer colors, like brown and cedar
- Natural colored walls or stonework
- Foliage that is red, orange or yellow (ex: highlighting oak trees)

**PURE WHITE - 3000K**

- Ideal for surroundings with dark materials, like deep slate, black or gray
- Foliage that is blue or purple (ex: highlighting blue spruce trees)

**COOL WHITE - 4000K**

- Complements contemporary homes and structures
- Commercial applications

**BRIGHT WHITE - 5000K**

- Works well for illuminating evergreen trees and shrubs
- Commercial applications
- Moonlighting applications

## Beam Spreads

Our integrated LED fixtures are available in a variety of beam spreads so you can tailor the light to where it's needed the most.

**10°-15°**  
Beam Spread

Tall, thin beam of light ideal for grazing trees and column features.

**25°-45°**  
Beam Spread

Medium width beam of light suited for general accent lighting.

**55°-60°**  
Beam Spread

Wide beam of light useful for broad trees and wide structures.

**120°**  
Beam Spread

Ideal for wall washing, grazing, and short yet wide, objects.

# Lighting Design Tips

## How to Uplight a Tree

No two trees are the same, and how the tree is situated within the landscape design will affect how you illuminate it. To assist you with planning, we have outlined some basic rules you can refer to when uplighting trees.

### SMALL DECIDUOUS

- **Single accent 35°:** Most small, deciduous trees only need one accent light, but it's important to take viewing angle into account. If viewed from two angles, the tree may benefit from two accent lights.
- **Canopy-aimed:** The fixture should graze the trunk and point up into the canopy for maximum effect.

*Recommended fixture: VLO 12V LED Small 35° (16016)*

### MEDIUM DECIDUOUS

- **Cross-lighting:** While it is possible to use one 60° accent, it is better in most cases to use two 35° lights because they will direct more concentrated light into the canopy.
- **Position the accent lights** so they graze the trunk but are focused on the canopy.

*Recommended fixtures: One VLO 12V LED Small 60° (16017) or two VLO 12V LED Small 35° (16016).*

### ADDITIONAL UPLIGHTING TIPS

#### Don't be Afraid to Make Contact

Most smaller trees will look best when the beam grazes the trunk on its way up to the canopy.

#### Bring Out the Contrast

Narrow beam widths throw more concentrated light on the trunk, creating contrasts and drawing out shadows, variations, bark texture, knots, and other features. By contrast, wide beam spreads soften details.

#### Less is More

Don't overpower your landscape features. Instead, aim to create contrast between light and shadows. An overlit tree can distract from an otherwise balanced landscape lighting design.

#### Plan Your Viewing Angles

Think about who will be viewing the lighting effects and at what angles. How will the tree appear from the street and from inside the home? More viewing angles may require more accent lights.

#### Think About Distance

When choosing beam angle, keep in mind that the angle will open up with a distance. A beam angle that starts at 15° may open up to 20° or 30° as it reaches the canopy of a tall tree. On the other hand, a narrow beam width that hits a thick branch close to the ground may get blocked and go no further.

## LARGE DECIDUOUS

- Different angles: A large tree (60-100 feet) will require a combination of accent lights with different angles.
- Place one 15° accent light at the base of the tree, highlighting the trunk up to the point where the branches begin.
- Place 2-3 accent lights (35° or 60°) away from the trunk pointing into the canopy\* and 1-2 accent lights in the canopy, pointing up.

*Recommended fixtures: VLO 12V LED Large 15° (16018) for the trunk, VLO 12V LED Large 35° (16019) or 60° (16020) for the canopy. Add 16091FRO beam expander to 16020 to go wider than 60°.*

### **\*Tree-mount junction box required:**

For each light in the canopy, use a tree-mount junction box with stand-off screws, so the tree has room to grow. Each junction box will provide a mounting location for one accent light. Connections and wire nuts go inside the box. Run the wire up the non-visible or least-visible side of the trunk and fasten it to the trunk with cable clamps, making sure that the wire can still move with the tree. Leave some extra wire at the base of the tree to allow for tree growth.

## LARGE FIR

- Total capture: Two accent lights with 60° beam spread to light up the tree on two sides, creating 360° of visual interest.
- Greater distance: With firs, the fixtures should be placed farther away from the base and should shine directly onto the tree (rather than aiming up into the canopy).

*Recommended fixture: VLO 12V LED Small (16016, 16017) or Large 35° or 60° (16019, 16020).*

# Lighting Design Tips

## How to Downlight a Tree

A Mood-Enhancing Option That Will Make an Outdoor Living Space Magical

### Add Drama and a Focal Point

Uplighting trees is dramatic and can create a focal point for the entire landscape lighting design. By comparison, downlighting is subtle and can create an inviting outdoor living space.

### Downlighting and Uplighting

Downlighting and uplighting can be used together on the same tree for maximum effect or used separately on different trees. Also, downlighting can be installed on structures, such as pergolas or gazebos.

### Enhance Social Gatherings

Downlighting makes a space inviting and delightful for social gatherings. It creates a special experience without the lighting itself being obvious.

### Simulate Moonlight

With a tall tree, downlighting can simulate the impression of moonlight and, with a gentle breeze, you will be able to see the shadows of branches and leaves at play on the ground. If you want to wow your customers, try enhancing one of their outdoor living spaces with downlighting.

### CREATE A BEAUTIFUL MOONLIGHT EFFECT

#### VLO 5000K LED High Lumen Accent

Comes equipped with a moonlighting kit which includes a Long Cowl and a 6500K CCT Mercury Vapor Green Lens to mimic the color of the moon. Use our Tree Bracket Mount (15609AZT) to install the fixture on trees for an optimal moonlighting effect.

## HOW TO CREATE DOWNLIGHTING

Identify a large deciduous tree on the property that is a focal point of the landscape or near an outdoor living space. A large, tall tree is best with branches that start high up, although you can use a smaller tree too.

Place one Variable Lumen Output (VLO) Small 60° wide accent light at least four feet above the lowest tier of branches, about 20-25 feet from the ground is ideal. Point the accent light downward, experimenting with the right direction for creating shadows with the branches below.

You can place the light lower or higher, but you want to avoid situations where the light is buried behind too many branches or where the light is visible or blinding from below.

## HOW TO MOUNT AN ACCENT LIGHT IN A TREE

Our VLO Small or Large 60° wide accent light is ideal for downlighting because it offers three-lumen levels to choose from, allowing you to get the lighting mood just right. You can also experiment with the beam expander lens that is available as an accessory.

We recommend using a tree-mount junction box with standoff screws for mounting the accent light, so the tree has room to grow. The junction box will provide a mounting location for one accent light. Connections and wire nuts go inside the box. Run wire up the non-visible or least-visible side of the trunk and fasten it to the trunk with cable ties and stainless-steel screws, making sure that the wire can still move with the tree. Leave some extra wire at the base of the tree to allow for tree growth.

### PRO TIP

A long cowl for the VLO Small accent light helps prevent the light source from being visible when looking up from the ground.

# Path & Spread Lighting Guide

## Why Path & Spread Lighting

Path and spread lights help illuminate sidewalks, stone pathways, and lawn walkways while adding a hint of intrigue to boulders, plant beds and patio perimeters. Spread lighting uses a path light inside a landscape bed to illuminate the plantings and ground cover.

### TYPICAL PLOT PLAN USING SPREAD LIGHT FIXTURES

It is important to use a center-to-center measurement, rather than linear, along the sidewalk to help plan for path and spread lights. This will help ensure your fixture spacing is not subject to the width of the walkway. The chart below outlines that most path lights have a 5-7' light spread from the fixture from each side of the center, which maintains a bare minimum .1 fc at that distance. A typical path light is 10' in diameter. You will need to double the distance of the below footcandle chart to get a full diameter.

Foot-candles by Item Number	DISTANCE FROM FIXTURE CENTER								
	0'	1'	2'	3'	4'	5'	6'	7'	
15810	10.5	5.7	2.4	1.0	0.4	0.3	0.2	0.1	
16120	20.0	7.6	2.8	0.9	0.4	0.2	0.1	0	
15870	16.5	7.2	2.5	0.7	0.2	0.1	0	0	

1 lumen = 1 candle  
1 footcandle = 1 lumen/ft<sup>2</sup>

### STAGGERED PATH LIGHTING

When using a staggered path lighting approach, we recommend installing the path lights at least 6" away from the edge of the pathway and space the fixtures at 15', using a center-to-center measurement, which will leave a 2'-5" gap between pools of light and properly illuminate the sidewalk.

### Additional Path & Spread Lighting Tips

- Spread lights are typically center mounted
- Most spread lights have a larger round or square area of light; the shade geometries will dictate the shape of the light spreads
- Use spread lights when illuminating sidewalks, lawn and flower beds at the same time
- Use path and spread lights sparingly, try not to overlap the light output of other path lights
- The wider the top canopy, the wider the spread because of a greater reflective surface

### MAPPING OUT YOUR PLAN

- 1 Make sure to always review your application area first.
- 2 Next, start drawing out some layout ideas with distance and measurements to ensure that you are accounting for the beam spread and photometrics of the selected fixture. We recommend planning for a total spread diameter light spread from the center of each fixture.

Check out our photometric details and diagrams on [Kichler.com](http://Kichler.com) for additional details and information.

For help with layout planning, contact our **APS Layout Team** at **844-KICHLER** (844-542-4537) or via email at [techsupport@kichler.com](mailto:techsupport@kichler.com).

15870AZT27R

### LINEAR PATH LIGHTING

By spacing the fixtures at 12', the gap between pools of light would end up being just over 2' on the near side of the walk and 9' on the far side of the walk.

# Landscape Lighting Techniques

Get the most out of a project with these professional landscape lighting techniques.

## WALL-WASHING

Delivers a subtle, low amount of light to a wide area, up close to the structure, with minimal hot-spots and density.

*Recommended fixtures: VLO 12V LED Accent 60° 16017 & 16020. VLO Mini Wall Wash 16026. Also 120V-277V C-Series 16210-16211, 16213-16214, 16218-16224.*

## CROSS LIGHTING

Using two or three beams of light, it creates 360-degree visual interest on large trees, statues or other tall features.

*Recommended fixtures: VLO 12V LED Accent 15°-35° 16015-16016, 16018-16019. Also 120V-277V C-Series 15°-40° 16209-16210, 16212-16213, 16215-16216, 16218-16219.*

## ACCENT LIGHTING

Shines light upward to illuminate an object or surface for dramatic, attention-getting visuals.

*Recommended fixtures: VLO 12V LED Accent 15°-60° 16015-16020. VLO High Lumen Accent 15°-60° 16160-16162. Also 120V-277V C-Series 15°-55° 16209-16220.*

## GRAZING

Adds depth and dimension to stucco, brick, stonework or architectural features of a home or building.

*Recommended fixtures: VLO 12V LED Accent 60° 16017 & 16020. VLO Mini Wall Wash 16026. Also 120V-277V C-Series 40°-55° 16210-16211, 16213-16214, 16218-16224.*

## SILHOUETTE LIGHTING

Draw attention to an interesting shape by lighting a vertical surface behind the object to accent that unique shape.

*Recommended fixtures: VLO 12V LED Accent 15°-60° 16015-16020. Also 120V-277V C-Series 15°-55° 16209-16220.*

## SHADOWING

A technique that projects the look of a tree or yard art onto a surface behind the object.

*Recommended fixtures: VLO 12V LED Accent 15°-60° 16015-16020. Also 120V-277V C-Series 15°-55° 16209-16220.*

## MIRROR LIGHTING

Create dream-like water scenes by strategically lighting background areas around bodies of water that reflect the landscape off of the water.

*Recommended fixtures: VLO 12V LED Accent 15°-60° 16015-16020. Also 120V-277V C-Series 15°-55° 16209-16220.*

## MOON LIGHTING

Placing a lower lumen fixture high in a tree catches the details of branches and leaves, emulating the look of moonlight.

*Recommended fixtures: VLO 12V LED Accent 60° 16162AZT50, 35°-60° 16016-16017, 16019-16020. VLO High Lumen Accent 35°-60° 16161-16162. Also 120V-277V C-Series 40°-55° 16210-16211, 16213-16214, 16218-16224.*

## UNDERWATER & WATER ACCENT

Enhance and highlight flowing water in waterfalls, streams and fountains. Create a magical mirroring effect on still waters.

*Recommended fixture: VLO 12V LED Underwater 16027.*

## IN-GROUND LIGHTING

Deliver light to permanent and semi-permanent installations such as sidewalks, large mature trees, walls and flagpoles.

*Recommended fixtures: VLO 12V LED In-Ground 16023-16025, 12V LED Mini All-Purpose Recessed 16140-16141. Also 120V-277V C-Series 16227-16228.*

## XERISCAPE LIGHTING

Cacti, grasses and the stone used in xeriscape designs can benefit from a lower lumen illumination than traditional landscaping.

*Recommended fixtures: 2700K fixtures; 12V LED Path 15811, 15821, VLO 12V LED Accent 16015-16017.*

## PATH & SPREAD LIGHTING

Illuminate sidewalks, stone pathways and lawn walkways while adding a hint of intrigue to boulders and plant beds. Spread lighting uses a path light inside a landscape bed to illuminate the plantings.

*Recommended fixtures: 12V LED Path Fundamentals 16120, Stepped Dome 15820 or Dome 15810.*

## DECK & PATIO LIGHTING

Accentuate all of the beauty and details of decks, patios, outdoor kitchens, steps, handrails and more.

*Recommended fixtures: (top) 12V LED Half Moon 15764. (bottom) 12V LED Brick Light 15773, LED Surface Mount Step Lights 16171-16172.*

## HARDSCAPE LIGHTING

Highlight stone features, retaining walls, outdoor kitchens, steps, handrails, benches and more.

*Recommended fixture: 6" 12V LED 16101.*

# Variable Lumen Output (VLO) Collection

## Designed for every growing application

Our Variable Lumen Output (VLO) product line with Lumen Effects System allows you to switch between lumen outputs easily within one fixture – all with the use of the Magnetic Key. Giving you and your team the flexibility to adjust on location before or after the initial installation has occurred.

Switch between lumen outputs easily within one fixture – all with the use of the Magnetic Key.

### THE ADVANTAGE OF OUR VLO PRODUCT LINE

**Lumen Effects System** eliminates the need to mechanically adjust or open the fixture, supporting product longevity.

**Versatile IP66-IP68 rated** design provides protection against dust particles and water, including powerful jets or submersion, based on rating.

**Flexible lumen levels** allows you to set and adjust the lumen levels as the landscape needs change.

**4,000 to 6,000-volt system surge protection** protects against power surges and irregularities, especially when paired with one of our transformers.

**Sealed and fully encapsulated** to safeguard from water ingress and the outdoor elements – helping to extend the life of the product.

**10-15 year limited warranty.** For details visit [Kichler.com/Warranty](http://Kichler.com/Warranty)

## Expanded Beam Spread

16090FRO

16091FRO

### VLO Beam Expanders

This sophisticated yet straightforward optical system allows you to add additional beam spread to any of our VLO Accent, In-Ground and High Lumen Accent fixtures with ease and precision. The supplemental system shapes, controls, and distributes light within defined areas providing installers versatility and design flexibility.

### Beam Spread Capabilities

Original Beam Spread	VLO LED Small Accent (16015-16017) with Small Beam Expander	VLO LED Large Accent (16018-16020), High Lumen (16160-16162) or In-Ground (16023-16025) with Large Beam Expander
15°	58°	60°
35°	66°	75°
60°	79°	90°

# Smart Control Timer & Kichler Connects™ App

Control your lights from anywhere.

The Kichler Smart Control Timer and Kichler Connects™ app work together to digitally control landscape lighting with a smartphone or tablet in minutes.

16085BK

## Smart Control Timer features

**External Antenna** increases range of signal outside of the enclosure.

**Easy installation** plugs directly into the transformer. Ideal for use indoors or in outdoor enclosures.

**Kichler Connects App** digitally controls the Smart Control Timer, available for iOS and Android.

**Bluetooth and Wi-Fi** allows for local or cloud-based control.

Installation as easy as...

### PLUG IT IN

Plug the Kichler Smart Control Timer into the enclosed transformer.

### DOWNLOAD THE APP

Download the Kichler Connects™ app from the Apple® App Store® or Google Play™.

### TURN ON LIGHTS

Use the app to control your landscape lighting or connect your smart home device to do it for you.

## Kichler Connects App features

**Create Custom Schedules** to fit your needs or select from preset schedules to align with the daylight savings hours and the changing seasons.

**Voice Control** via Amazon Alexa™ or Google Home™ lets you tell your landscape lighting to turn on or off.

**On-Board Memory** to control your lights even if the Wi-Fi connection is interrupted.

**Usage Share** lets multiple family members share control of the lighting.

## Smart Control Timer Compatibility

KICHLER TRANSFORMERS		
Contractor Series	Plus Series	Professional Series

		15PR1200SS

*"Alexa, turn on the landscape lights."*

Let your voice do the work.

Use voice commands with smart home devices like Amazon Alexa™ or Google Home™ to tell your landscape lighting to turn on or off.

[Kichler.com/Kichler-Connects](https://www.kichler.com/Kichler-Connects)

# Outdoor Lighting

## Light Up the Great Outdoors

The outdoor space should feel like an extension of the home. Comfortable, welcoming and a reflection of one's style. But with outdoor spaces, you can go a step further. With a little décor and the right light, you can make a backyard feel like an outdoor oasis.

## SUPERB APPEAL

With your customer's front porch or doorway area, they have a chance to welcome guests to their home before they even set foot in the door. A large, outdoor wall-mounted fixture next to the door will say 'welcome' even better than a clever welcome mat. And a ceiling light and pendant will put polish on a front porch.

## GARAGE LIGHTS

One of the safest ways for one to arrive home at night is with the right garage light. An RLM fixture, also known as a barnlight or gooseneck light, is a stylish and versatile way to bring light to a garage. To determine how large the fixture should be, simply multiply the width of the garage door in inches by .25 (for a single car garage) or by .33 (for a two-car garage).

## Mix, Match & Maximize

The style of a home shouldn't be limited to the space within the walls. The decor outside a home can express your customer's style with the use of mix and matching fixtures and finishes.

### MIX FINISHES

Mixing finishes is a simple way to keep a patio, deck or outdoor space from looking too uniform. When mixing finishes or metals, stick with two to three metals max. Opt for opposing colors, like black and brass, or stick to a similar cool or warm shade, like chrome and nickel. Also consider the finishes of the outdoor furniture, door hardware, or outdoor kitchen knobs as part of the mix and match plan.

### MIX TEXTURES

When talking textures, you can mix the texture of the finish, like shiny with matte, but you can also mix the texture of the glass. For instance, clear seeded glass casts an ambient glow and pairs well with etched glass, which diffuses the light. When combined, these glass types create a unique and inviting look to a home's exterior.

# Outdoor Ceiling Fans

## Keep the Outdoors Cool

Our outdoor ceiling fans bring style and airflow to your customer's favorite outdoor space. Each ceiling fan offers premium finishes and hardware designed to withstand the elements, delivering worry-free performance year after year.

### CEILING FAN PERFORMANCE GUIDE

#### Here's what the numbers mean to you.

Designing ceiling fans that maximize performance for our customers has always been how we do business. We display a rating system for each fan we offer, so you can compare fans with confidence.

Look for this rating guide listed with every Kichler® fan.

AIR PERFORMANCE *		
Airflow Cubic Ft. Per Minute on High	Power Usage Watts on High (Excludes Lights)	Airflow Efficiency Cubic Ft. Per Minute Per Watt
<b>7308</b>	<b>32</b>	<b>225</b>
Engineered for Optimal <b>AIRFLOW</b>	Designed for Minimum <b>POWER USAGE</b>	Built for Enhanced <b>AIRFLOW EFFICIENCY</b>
Airflow is measured in Cubic Feet Per Minute (CFM) – a U.S. Government-mandated standard. <ul style="list-style-type: none"> <li>The higher the airflow number, the more air the fan is circulating.</li> </ul>	Power usage for your fan motor is measured in watts. <ul style="list-style-type: none"> <li>The lower the watts, the less energy the fan consumes.</li> <li>DC motor ceiling fans are the most energy-efficient, using the least amount of wattage.</li> </ul>	Airflow efficiency gives you the total picture: dividing the fan's CFMs by the watts of power it consumes. <ul style="list-style-type: none"> <li>The higher the airflow efficiency number, the more air the fan is moving per watt.</li> </ul>

\*Performance values are based on indoor applications and may vary when used in outdoor applications.

# Choosing The Right Size Ceiling Fan For Your Outdoor Space

1

## STEP ONE

### Determine the square footage of your space.

Measure the length and the width of the space and then multiply. For example:

$$\begin{array}{ccccccc}
 \text{10 Ft.} & \times & \text{12 Ft.} & = & \text{120 Sq. Ft.} \\
 \text{Width} & & \text{Length} & & \text{Space Area}
 \end{array}$$

2

## STEP TWO

### Have a tall space with sloped or vaulted ceilings?

The rule of thumb is that fans should have a minimum of 7 feet of clearance between the bottom of the fan blades and the floor in order to circulate the air efficiently. Many of our ceiling fans work with 8 or 9 foot ceilings. If your ceiling is higher, you'll need a downrod.

For sloped ceilings, especially in coastal/windy areas, a slope adapter is recommended. For ceilings in excess of 15° of slope, please utilize our 60° Slope Adapter (337005).

30°

45°

60°

3

## STEP THREE

### Determine the fan size you need:

75-100 SQ. FT.	100-200 SQ. FT.	Over 200 SQ. FT.
<b>OUTDOOR SPACE</b>		
75 to 100 square feet	100 to 200 square feet	Over 200 square feet
<b>RECOMMENDED BLADE SWEEP</b>		
50" to 54"	56" to 70" or multiple fans	Over 70" or multiple fans

\* The recommended square footage shown here accounts for outdoor variances for fan use to better guide your blade sweep selections. As outdoor wind and temperature variances can interfere with the anticipated airflow, we suggest referencing the indoor air performance data available for each fan to aid in selecting a fan with higher air performance.

Notes	For use with #12-2 or #10-2 low-voltage cable only.	Master pack of 5.

# Key Components When Choosing LED Lamps

We know that each landscape project is unique – an application may look better with a warmer color temperature versus a cooler one, or an area may need a tighter beam spread while others might need a larger one. To get the perfect design, you need to make sure you have the right fixture and the correct LED bulb before you get started. That is why it is important to consider the socket base, lamp type, beam angle, lumen level, and color temperature when selecting LED lamps for your project.

## Beam Angle and Color Temperature Options

### CHOOSE THE RIGHT BEAM ANGLE

- Use a 10-15° spot to light the trunk of a tree or highlight a column.
- One 35° flood light works well for a small deciduous tree or create a cross lighting effect using two 35° floods for a medium-sized tree.
- For wide tree canopies a 60° works best. Cross lighting can be achieved using two 60° floods on each opposing side of the tree.
- 180°-300° Omni-directional lamps are suitable for hanging lights, path & spread, deck, and wall wash fixtures - anywhere indirect light spread is desired.

**WARM WHITE COLOR - 2700K**

- Surroundings with warmer colors, like brown and cedar
- Natural-colored walls or stonework
- Foliage that is red, orange or yellow (ex: highlighting oak trees)

**PURE WHITE COLOR - 3000K**

- Surroundings with dark materials, like deep slate, black or gray
- Foliage that is blue or purple (ex: highlighting blue spruce trees)

## Contractor Series LED Lamps

**Our Contractor Series** provides top LED lamp lighting styles and color temps at a professional performance value. These include:

- Popular LED lamp styles in 2700K and 3000K
- Compatible with all Kichler drop-in fixtures
- Consistent results: 9-15V operating range with no loss in light output
- 7-step binning for close color consistency
- CRI of 80+

Offering a 3-year warranty, the Contractor Series LED Lamps provide the flexibility of selecting from a simplified portfolio while still meeting your clients' landscaping needs and budget.

## Professional Series LED Lamps

**Our Professional Series** is designed to last and offers the quality, variety, and design options you are looking for in a LED lamp. These include:

- Consistent results: 9-15V operating range with no loss in light output
- Custom TIR acrylic optics: superior control and light uniformity
- 4-step binning gives the most consistent color output from lamp to lamp
- High lumens per watt & total lumen output
- Fully encapsulated: protects internal components from the outdoor elements
- CRI of 85+

With a 6-year warranty and our widest selection, these lamps are designed to meet the unique landscape needs of your clients with top performance.

A man wearing a blue cap, a grey long-sleeved shirt, and a dark blue vest is kneeling in a garden. He is holding a long, dark, flexible cable that is connected to a small, dark, circular object on the ground. The ground is covered with small, light-colored stones. There are green ferns and other plants in the background. The overall scene is outdoors and appears to be a landscaping or maintenance project.

## NOTES

- Bulbs not included unless otherwise noted.
- Wattages stated are the maximum allowed; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA standards for use in U.S.A. and Canada except where noted.
- All chain drop products equipped with at least 72" of chain unless otherwise noted.
- All products featured in the outdoor section are certified and listed to UL/CSA standards for wet location except where noted.
- On some products, in order to accommodate higher-than-normal ceiling height, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants, and other forms of weathering.
- In outdoor settings, the optional handheld ceiling fan controls are recommended and should be stored in an area protected from the elements. Wall-mounted controls that come standard with many fans are not damp or wet-rated.
- To serve you better, Kichler Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

Kichler Lighting is a member of the American Lighting Association (ALA), a trade association representing the residential lighting and ceiling fan industries in the United States and Canada. Its membership includes leading lighting and fan manufacturers, showrooms (retailers), manufacturers representatives and designers. ALA members are dedicated to providing the public with the proper application of quality residential lighting.

## CONSUMER NOTICE

### Federal Legislation to phase out 100 watt Incandescent Bulbs started January 2012

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310-2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100 watt bulbs in January 2012 and will end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps and plant lights.

By 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as LED lamps.

References: [www.energy.senate.gov](http://www.energy.senate.gov)

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor lantern products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite® lanterns.

Due to environmental conditions such as soil acidity, concrete alkalinity and other corrosive soil and air conditions, we cannot guarantee our direct burial posts.

# Symbol Guide

**D** **Damp-Rated:** Used in sheltered areas that are protected from direct contact with rain, snow or excessive moisture.

**I** **Damp-Rated Ceiling Fans:** Engineered for high-humidity areas. Requires a solid covering over the full fan to avoid direct contact with the elements.

**W** **Wet-Rated:** Suitable for direct contact with rain, snow or excessive moisture (such as fog or ocean spray).

**I** **Wet-Rated Ceiling Fans:** For open or direct exposure to sun, rain or water spray. Can be installed on a structure with less cover, like a pergola, and withstand contact with moisture.

**C** **CLIMATES™:** Ideal for areas with extreme temperatures, saltwater spray and consistent UV exposure.

**★** **Dark Sky compliant:** Aligns with the International Dark-Sky Association (IDA) standards of reducing light pollution, protecting the night skies for present and future generations.

**DC** **DC Motor:** Energy-efficient and uses up to 70% less electricity than AC motor fans with whisper-quiet operation.

**LED** **LED:** Integrated LED light source with a long life that uses up to 90% less energy than incandescent light sources.

**016 Title 24, Part 6:** A document that contains the California Building Energy Efficiency Standards as regulated by the California Energy Commission. Products marked with this logo and labeled as JA8-2019 or JA8-2019-E have been found to meet the requirements stated in 2019 T24, Part 6. For more information, visit [www.energy.ca.gov/title24](http://www.energy.ca.gov/title24).

**FCC** Federal Communications Commission electronic devices designated with this logo comply with part 15 of the FCC Rules.

Many Kichler Lighting C-Series fixtures appear on the DesignLights Consortium (DLC) qualified list of products and are marked with a \* in the 120V-277V section. Visit [www.designlights.org](http://www.designlights.org) for a complete listing.

## Our Vision

At Kichler Lighting, everything we do, every single day, is with the intention of creating and delivering products that allow people to see what matters most to them. We will do that by relentlessly pursuing quality, ensuring continued innovation, always going one step further in our commitment to exceptional customer service and education, as well as creating on-trend designs that are both stylish and “life-stylish,” promising to deliver project success for you.

Get inspired at [Kichler.com](https://www.kichler.com)

# KICHLER
